

PRIVATE RACK COLOCATION

Available in quarter, half and full size, our private racks in Telehouse North are 800mm wide and come with at least 100Mbps of IP transit included.

Our client portal allows remote reboots, custom labelled PDU ports and real time power usage.

Quarter and half racks are subject to availability, please speak to our sales team for more information.

SHARED RACK COLOCATION

Our collocated devices are hosted in our 800mm wide shared rack, physically managed by EX Networks engineers.

Our client portal allows remote reboots for your devices, giving you control from your desk.

All collocation packages come with 50Mbps of IP transit included and OOB serial console ports for remote access to your network equipment.

POINT TO POINT CIRCUITS

EXN can provide MPLS pseudowires between on-net datacentres, extending your network across multiple facilities. This can be thought of as a single virtual ethernet cable between your sites, providing a simple and reliable solution for your East to West traffic.

For larger requirements, we can also offer 10G/100G DWDM wavelengths between our sites.

Data Centres include:

Telehouse East (THE)	Telstra London Hosting Centre (LHC)
Equinix Slough (LD4/5/6/7)	Equinix LD8 (formerly HEX)
